

**“Guaranteed concrete plex
at the lowest price”**

Engineered in Belgium
Unique in Europe !

GUARANTEED CONCRETE PLEX

The Solid John is a guaranteed concrete plex composed of several wood veneers that are adhesively bonded to one another. The panel is suitable for bridging over the cavity and all kinds of other building applications in a humid but sheltered external context.

- 10-year guarantee against swelling, rotting and delamination
- the only one suitable for external applications
- fulfils all European standards

Extra advantages beyond the lowest price:

- Paintable on one side
- No sealing necessary
- No colour bleed

“Guaranteed concrete plex at the lowest price”

HYBRID POLYMER

Solid John hybrid polymer is a 1-component, permanently elastic glue kit, on the basis of a moisture-curing MS Hybrid polymer for adhesively bonding the Solid John cavity plank and for all other elastic bondings in construction.

- ✓ Installable on hollow bricks
- ✓ Installable on moist substrates
- ✓ Perfect alternative to mechanical fastening
- ✓ Designed for fast installation
- ✓ Universally applicable on mineral substrates
